EEG cup electrodes

EEG cup electrodes have been designed to withstand long-term use by medical technicians. The precision stamped electrodes are available in two diameters: the pediatric, 6mm (0.24") or the adult, 10mm (0.39") size. They are stamped in two materials, 99.9% pure silver or tin. The silver electrodes are then covered with a heavy gold-plate, silver chlorided or kept silver. The flexible silicon coated wires are standard in multi colors.
